WOJCIECH MECK

wojciechmeck@gmail.com   +43 6764138247

I am a graduate Web Developer and an aspiring Frontend Engineer, a subject which I am very passionate about. I am interested in web technologies, and I am continuously growing my skillset in trending solutions.

PROJECTS

Adventure for Impact Web Application and Landing Page

Web Application and Landing Page for a hostel, with a booking system and hostel management.

- Created front-end code using HTML, CSS, JavaScript, jQuery to create a responsive web application that works across desktops, tablets, and mobile devices.
- Designed an initial, high-quality mockup using Figma
- Use of multiple APIs, matching the need of the web application
- Regular project updates on GItHub

Timer Web Application

Team project with a goal to create a time management web app

- As part of this project, I was responsible for creating the data table and the functionality that controls the data
- Making sure it's coherent with overall design and responsive

WORK EXPERIENCE

June 2023- Present

Part-time Frontend Developer at Lekkalu Frontend
- Developing functionalities based on Figma designs and project requirements
- Implementing API with Axios
- Successfully integrated websites with powerful backend services such as databases, APIs, and other services

Jun 2022- May 2023

Transport Manager at Transped Europe
- Provided me with wide opportunities for expanding my interpersonal skills, team work and logistics planning through managing transport routes between Sweden and Italy
- I widely developed my customer service experience.
- Improved my English speaking and writing skills
- Solving logistic problems on daily basis, often under pressure of time

EDUCATION

Oct 2022- May 2023

Wyzsza Szkola Bankowa w Sopocie
Junior Web Developer

I currently attend a one year online weekend course of Frontend Engineering, expanding my knowledge of various coding languages as well as design systems, while working on real-life projects.

Oct 2018- Feb 2022

Maritime University in Gdynia
Engineer of Ship Electroautomation

During the course I have learned how to use AutoCAD, PLECS, MATLAB & SIMULINK, TIA Portal, Excel, as well as completed multiple internship projects as part of my degree (more details in work experience). In order to pass the course I had to represent my skills in a written thesis and live presnetation.
